BLOOM & BUNCH KL

Mobile Floral Ordering & Delivery Management System

SWE/137/24B

01 ABSTRACT

Bloom and Bunch Kuala Lumpur is a flower ordering and delivery management app built with Flutter and Firebase. Customers can browse bouquets, customise arrangements, choose delivery dates, and follow order progress. Separate workspaces support florist preparation, rider delivery, and store administration. The server validates prices, manages stock reservations, and controls order-status changes.

02 PROBLEM STATEMENT

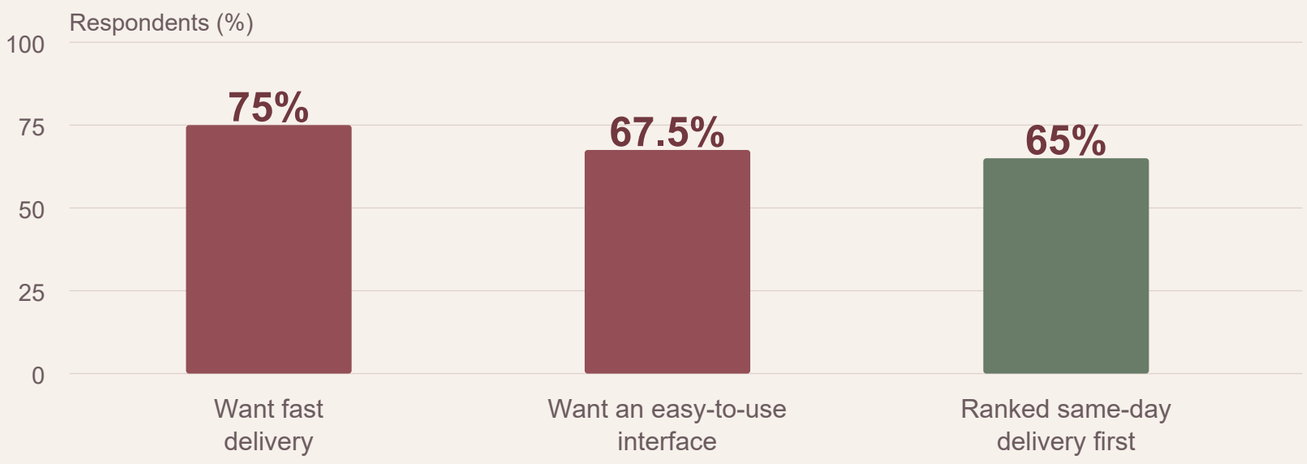

1. **Limited customisation**
   Pre-designed bouquets restrict choices of flowers, wrapping, and gifts.
2. **Inefficient communication**
   Chat and phone orders require repeated clarification and risk order errors.
3. **Unclear delivery progress**
   Limited status updates and booking options make delivery planning difficult.

03 OBJECTIVES

1. **Personalise bouquet ordering**
   Let customers customise bouquets according to their preferences.
2. **Organise order communication**
   Record clear order requirements for customers and florists.
3. **Support delivery planning**
   Provide delivery-date selection and real-time order-status updates.

04 RESULT / FINDING

CUSTOMER PRIORITIES IN FLOWER ORDERING

Q10: desired features (bars 1-2). Q15: delivery priority (bar 3).

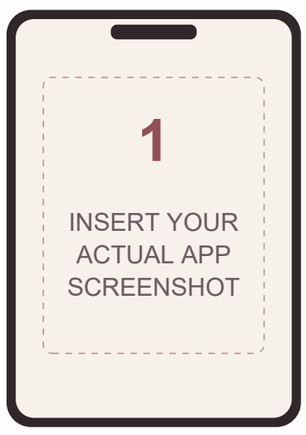

WHAT THE RESPONSES SUGGEST

Respondents prioritised fast delivery and an easy-to-use interface. Open-ended feedback also raised late deliveries, limited bouquet choices, and slow seller responses.

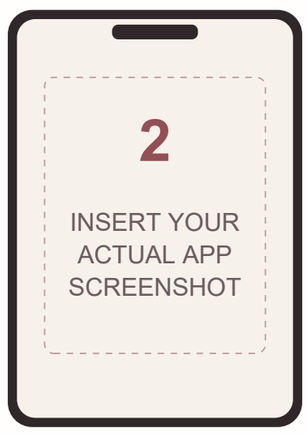

Source: FYP report, Section 2.2.2.
Questionnaire evidence about customer needs.

05 PROJECT DESIGN

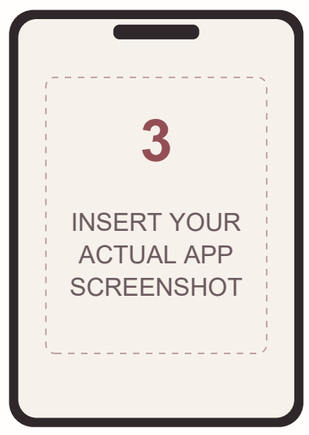

PLACE ORDER → PREPARE BOUQUET → RIDER COLLECTION → DELIVERY → CONFIRM RECEIPT

Custom Bouquet Builder

Florist Order Management

Customer Order Tracking

Technology: Flutter / Dart | Firebase Authentication | Cloud Firestore | Cloud Functions

06 CONCLUSION

The application brings bouquet customisation, order records, and delivery coordination into one workflow. Evaluation with customers and store staff is needed to measure usability and operational benefits.
